

Experience

USC Viterbi School of Engineering

Los Angeles, California

May 2015 - Present

Computer Science Ph.D. Student

- Led a 7-person team, alongside physiologists, computer scientists, and biologists.
- Wrote a neural network learning algorithm to control a human cadaveric hand by its muscles.
- Designed partnerships with USC, Northeastern University, and Pomona College to host 22 internship fellows with funding or credit, and led teams in designing research-grade code.

Tools: Scala, Python, R, Spark, EMR, HDFS, R, D3.js, Meteor.

Swiss Federal Institute of Technology

Zürich, Switzerland

April 2015 - May 2015

Visiting Computer Scientist

- Taught biostatistical techniques to 5 professors and 6 students at the Department of Theoretical Computer Science.
- Presented multiple research talks in Zürich.
- Derived and implemented a highly theoretical hit-and-run algorithm in Spark.
- Published resulting research at the IEEE Engineering in Medicine and Biology Society in Milan, and in Frontiers in Computational Neuroscience.

Tools: Scala, Java, Spark, HDFS, Python, R, Amazon EC2, and MongoDB.

Toyota Motor Sales

Torrance, California

January 2015 - April 2015

Consultant

- Single-handedly developed a crowd-sourced data validation platform that connected with tens of thousands of participants.
- Evaluated the statistical effectiveness of machine learning algorithms implemented.
- Identified significant flaws in the C360 Dealer-Concerns model, and provided exceptional proof of their existence.

Tools: Amazon Mechanical Turk, Python, R, D3.js, Scala, mllib, and HDFS.

Keck Graduate Institute

Claremont, California

May 2014 - August 2014

Project Data Scientist

- Created massively distributed in-memory machine learning frameworks to hold the 10-terabyte network and graph database from the USPTO.
- Applied a gradient boosted decision tree to predict new utility patent clusters.

Tools: AWS EC2, HDFS, R, h2o.ai, Spark, Amazon RDS.

Eli Lilly and Company

Indianapolis, Indiana

September 2013 - May 2014

Consultant

- Interfaced directly with Tony Zhang, the Vice President of R&D-Asia for 9 months.
- Led a team of six people in developing proprietary software to improve patient compliance.
- Wrote a real-time machine-learning pipeline that tags tweets about issues with competing medications.

Tools: AWS, Python, scikit-learn, R and D3.js.
