

Curriculum Vitae
January 30, 2019

Professional Areas

Neuromechanics of vertebrates and robots (Ph.D. Thesis), Application of VR/AR to a clinical exam-room environment, Strategic consulting for biotech artificial intelligence, Data analysis and visualization at scale, design and fabrication of custom scientific equipment.

Academic Summary

University of Southern California <i>Ph.D. Computer Science, Viterbi Dean's Doctoral Fellowship</i>	<i>2015-Present</i>
University of Southern California <i>Masters Degree - Computer Science</i>	<i>2018</i>
Pitzer College <i>B.A. with Honors - Computational Biology</i>	<i>2014</i>

Current Research Support

National Science Foundation Graduate Research Fellowship (GRFP) PI: Brian A. Cohn, M.S.	<i>2017-2020</i>
---	------------------

Experience

USC Viterbi School of Engineering <i>Los Angeles, California</i>	<i>May 2015 - Present</i> Computer Science Ph.D. Student
<ul style="list-style-type: none">• Wrote a neural network learning algorithm to control a human cadaveric hand by its muscles.• Mentored over 40 industry-projects through the USC Capstone Program• Designed partnerships with USC, Northeastern University, and Pomona College to host 22 internship fellows with funding or credit, and led teams in designing research-grade code.	
<i>Tools: Scala, Python, R.</i>	
Swiss Federal Institute of Technology <i>Zürich, Switzerland</i>	<i>April 2015 - May 2015</i> Visiting Computer Scientist
<ul style="list-style-type: none">• Taught biostatistical techniques to 5 professors and 6 students at the Department of Computer Science.• Presented multiple research talks in Zürich and published research in IEEE EMBC in Milan, Italy.	
<i>Tools: Scala, Spark, HDFS, Python, R, Amazon EC2, and MongoDB.</i>	
Toyota Motor Sales <i>Torrance, California</i>	<i>January 2015 - April 2015</i> Consultant to
<ul style="list-style-type: none">• Single-handedly developed a crowd-sourced data validation platform that connected with tens of thousands of participants.• Evaluated the statistical effectiveness of machine learning algorithms implemented.• Identified significant flaws in a model, and provided exceptional data-driven evidence for the new redesign.	
<i>Tools: Amazon Mechanical Turk, Python, R, Scala.</i>	
Eli Lilly and Company <i>Indianapolis, Indiana</i>	<i>September 2013 - May 2014</i> Consultant to
<ul style="list-style-type: none">• Interfaced directly with Tony Zhang, the Vice President of R&D-Asia for 9 months.• Led a team of six people in developing proprietary software to improve patient compliance.• Wrote a real-time machine-learning pipeline that tags tweets about issues with competing medications.	
<i>Tools: AWS, Python, scikit-learn, and R</i>
